

ARGON BUSTER

M4 CLASS SHIP

original model

The ship is from a game called X3: Reunion. The model contains some errors and doesn't look exactly like the original model.

The model doesn't have any instructions but there is a pdo* file in the zip archive so you can see the model in 3D.

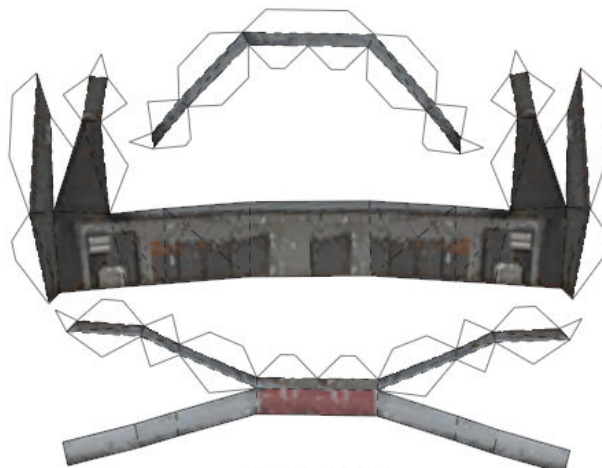

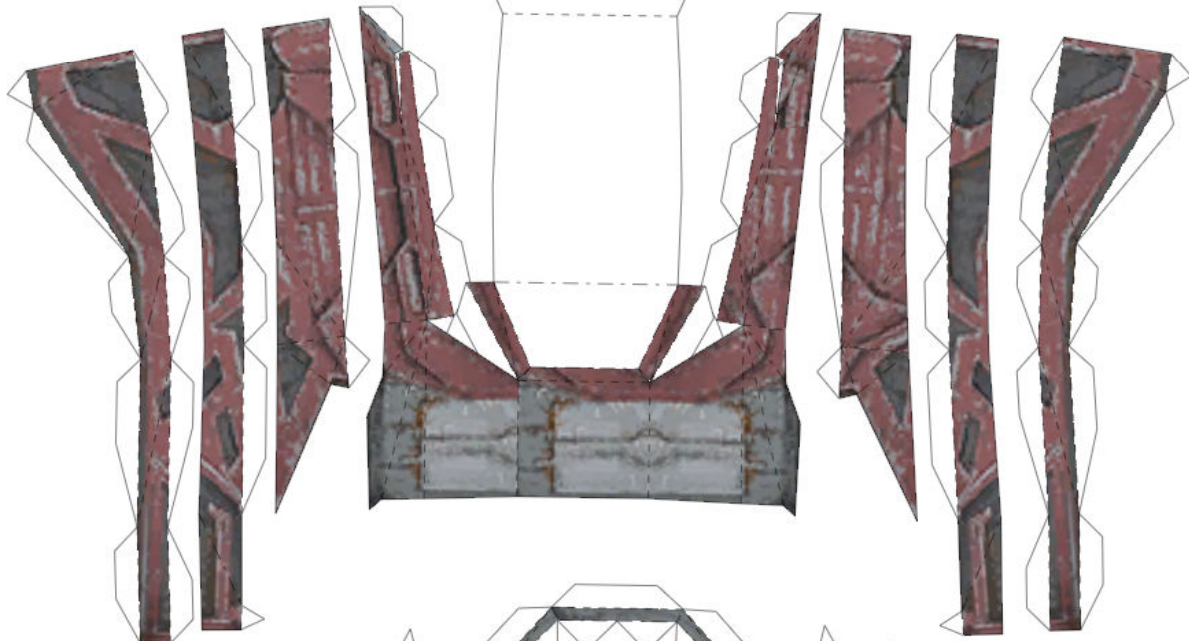

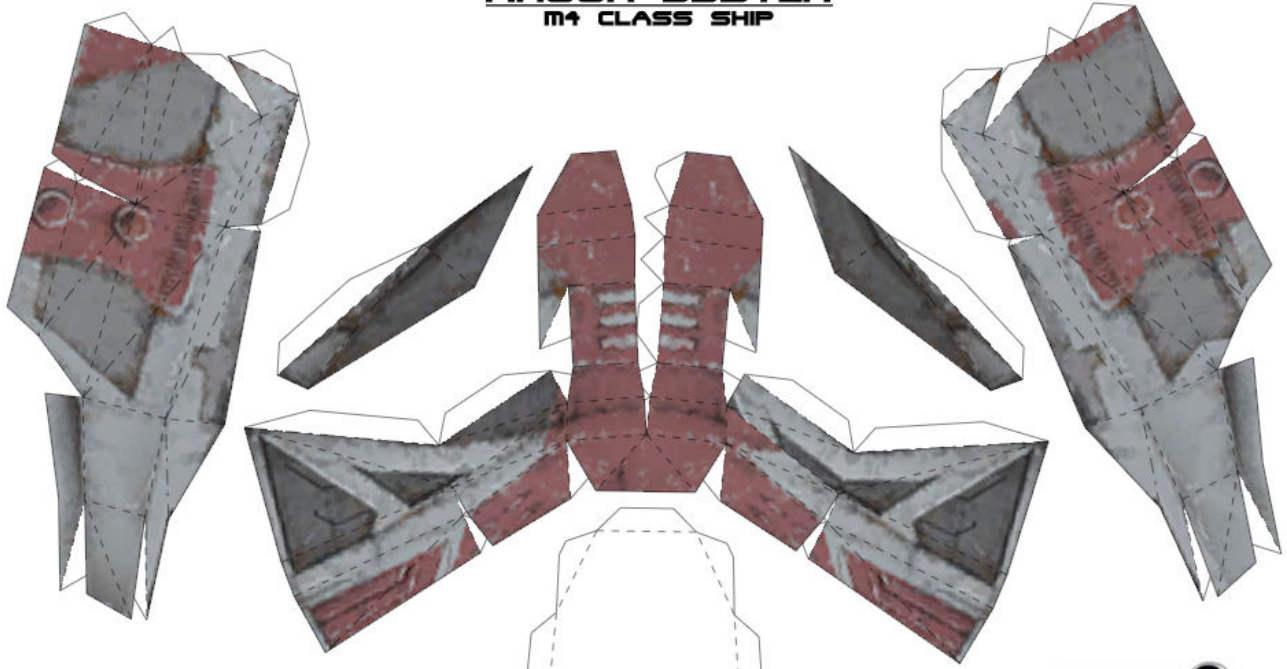

*=the pdo file opens with Pepakura Viewer.

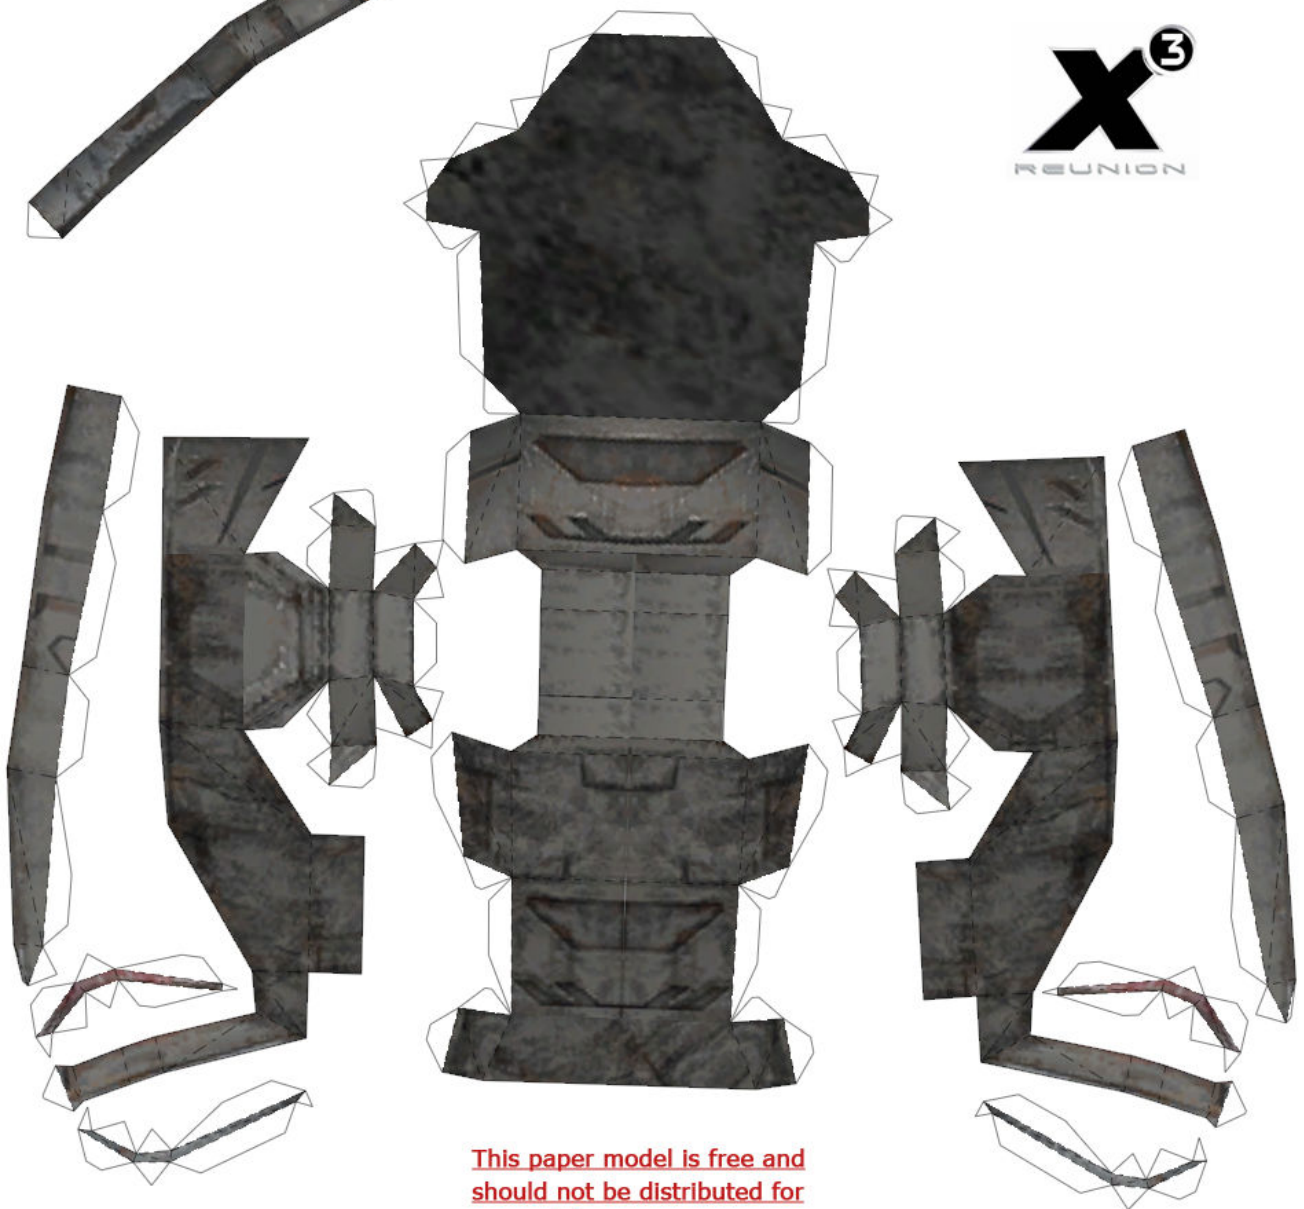

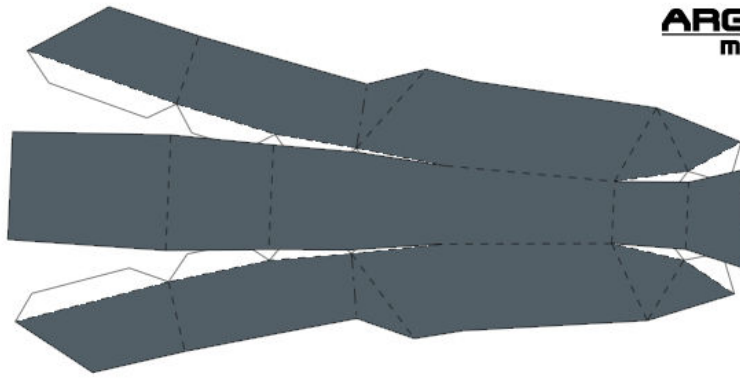

This paper model is free and should not be distributed for commercial use.
